

Addendum

Addendum

The major portion of this volume was completed in 1990. Since that time searches of the computerized medical databases have continued, and over 300 additional references to spontaneous remission of cancer and other diseases which were published in medical journals between 1990 and 1992 have been collected and integrated into the remission database.

A portion of these references are presented as bibliographic citations in this addendum. Future supplements to this bibliography are planned with some of the references in this addendum expanded to include summaries and case reports.

The addendum contains 286 bibliographic citations; 100 of these are references to the spontaneous remission of cancer and 162 to remission of diseases other than cancer. Twenty-four references which are relevant to the subject material contained in the appendices to this volume are also included in the addendum.

The addendum is arranged in a manner similar to the main text of this volume. A summary of the contents of the addendum is presented in the following table.

Contents of Addendum		References (#)
Section		
Part One: Remission of Cancer		
Lip, Oral Cavity, and Pharynx		3
Digestive Organs and Peritoneum		11
Respiratory and Intrathoracic Organs		10
Bone, Connective Tissue, and Soft Tissue		6
Skin		10
Neuroblastoma		7
Genitourinary Organs		13
Eye, Brain and Nervous System, and Endocrine Glands		10
Lymphatic and Hematopoietic Tissue		30
Totals		100
Part Two: Remission of Diseases Other Than Cancer		
Infectious and Parasitic		15
Endocrine, Nutritional, Metabolic, Immunity		30
Circulatory System, Blood and Blood Forming Organs		42
Nervous System, Sense Organs, Mental Disorders		16
Respiratory System		5
Digestive System		10
Genitourinary System, Pregnancy Related		16
Skin, Subcutaneous Tissue, and Musculoskeletal System		12
Injury Related		16
